	Balance of the loan:	€ 0 on 31-12-2007	
	Date awarded:	20-03-2008	
	Date of start:	01-06-2008	
	General Compliance (reporting and repaying)	<b>Not yet possible to assess</b>	

Summary of achievements since start of project

**PPR Foundation collects plastic from urban waste and does separate the plastic by species (LDPE, HDPE, PP, PET, PC etc). The plastic is cleaned, shredded, heated and made into pellets to be used by its clients as the source of new packing materials. PPR employs 16 in the recycling plant and as collection supervisor and has 250 contracted labourers to collect plastic waste and select plastic from city waste in a variety of Aceh urban centres. Generally these people do live in substandard houses near to their place of work (waste collection points).**

**It is the objective of PPR Foundation not only to generate an income for its employees and contracted labourers, but in addition to help them improve over all living conditions. To this end the present project was started. In a first phase the 16 employees and 9 collectors have been selected for the housing scheme. PPR will build the houses. To pay for their new homes, 25 to 50% of the income will be deducted at the source during a 10 year period. After this period the homes will be the property of the employees.**

Date summary: 16-06-2008

	Ir. Baharuddin Sanian; Founder and Chairman of PPR		Mrs. Nila Aswita; Treasurer of PPR and administrative assistant
---	--	--	---

Mrs. Cut Delsi Hasrina, working for Oikocredit and monitor to the project.

Example of present home

Model Home to be built

PPR employees and some visitors from abroad

Some employees with samples of production

Selection of waste

Operator at shredding machine
